

This presentation will outline UKERNA's network access trials to widen access to the JANET network. Two trials will be reviewed (1) JANET ADSL Trial - connecting off campus learning centres directly to JANET and (2) JISC Two-Way Satellite Trial - connecting off campus learning centres and individual learners in remote areas to the Internet. Other network access activities will be mentioned. The presentation will also discuss the relevance and opportunities of working with other European NRENs.
