

Jean-Philippe Martin-Flatin is Technical Manager, DataTAG Project at CERN. He coordinates activities in network protocols for gigabit WANs, monitoring and information modeling for data-intensive Grids. In 2000-01, he was a principal MTS with AT&T Labs Research in Florham Park, NJ, USA, where he worked on information modeling and consulted to business units in network management. He has 15 years of work experience and is the author of a book (Web-Based Management of IP Networks and Systems). He holds a Ph.D. degree in CS from EPFL, Switzerland. He is a Senior Member of the IEEE and a co-chair of the GGF Data Transport Research Group. <jp.martin-flatin@cern.ch>
