

PETER STEFAN has an M.Sc. degree in Information Engineering, and has been working as a Solaris system administrator for 5 years. He joined to the NIIF/HUNGARNET Hungarian Supercomputing Center in 2001. From 2001 to 2003 he participated in many grid and high availability clustering projects, and experienced supercomputing technology from many aspects, such as networking, code porting or user support. Besides his system administrator activity, now, he is the leader of the Hungarian ClusterGRID project, which aims to integrate more than 2000 PC-s into a single, country-wide virtual supercomputer.
