Zvonimir Zelenika received his B.Sc.E.E at Department of Telecommunications of Faculty of Electrical Engineering and Computing in Zagreb in 2001. Since 1996. he worked first as a student researcher and later as the head of CARNet's Research and Development Laboratory (CARNet RDLab), contributing and leading numerous projects in development of networked multimedia services (ATM and H.323 videoconferences, CARNet MoD and TV multimedia services, etc.). In 2000. he worked on the development and acceptance of future telecom services (G3 mobile) in British Telecom PLC. Currently he's a head of network infrastructure in Croatian Railways IT, developing next-generation network and services.
