

**Saverio Niccolini** received his “Laurea” degree in Telecommunications Engineering from the University of Pisa in 2000. He is presently a Ph D. student with the Telecommunications NetGroup Laboratories at the University of Pisa where he is also a teaching assistant. His research interests include Voice over IP, Next Generation Networks architectures, QoS traffic engineering and measurement techniques. Currently he is involved in the “INTERMON” EU research project (“Advanced architecture for INTER-domain quality of service MONitoring, modelling and visualization”) within an internship at NEC Europe Research Laboratories at Heidelberg, Germany. He is the project coordinator of the IP Telephony Cookbook project funded by TERENA. <s.niccolini@iet.unipi.it>
