

## **Towards a modern multimedia infrastructure: the CARNet Video Network**

**Authors:** Zvonimir Zelenika, Robert Macek; CARNet - Croatian Academic and Research Network, Josipa Marohnica b.b., Zagreb, Croatia

**Abstract:** Goal of the paper is to give an overview of activities required in creation of new technical, infrastructural and organizational framework for introduction of multimedia services and applications within Croatian academic and research community. By identifying, analyzing and designing (through various projects) elements of such multimedia infrastructure, we create firm foundations for introduction and implementation of multimedia services within both CARNet and entire community.
