Future European Union research policy

On 6 April the European Commission adopted a proposal for a new EU programme for Research. The proposal provides new impetus to increase Europe's growth and competitiveness, recognising that knowledge is Europe's greatest resource. The programme places greater emphasis than in the past on research that is relevant to the needs of European industry, to help it compete internationally, and develop its role as a world leader in certain sectors. The programme will also for the first time provide support for the best in European investigator-driven research, with the creation of a European Research Council. Focus will be on excellence throughout the programme, a requirement if it is to play its role in developing Europe's global competitiveness. Another priority will be to make participation in the programme simpler and easier, through measures addressing the procedures, plus a rationalisation of instruments. In spite of this new approach, there are many elements of continuity: in practice, for the majority of participants, the programme itself will not change, but participation will become simpler.

Ubijen libanonski ministar

U predgrađu glavnoga libanonskog grada Bejruta u utorak je ubijen čelnik stranke Phalange i ministar industrije Pierre Gemayel, javili su lokalni mediji. Istaknuti antisirijski orijentirani kršćanski političar ubijen je u atentatu u predgrađu Bejruta. Analitičari predviđaju da će Gemayelovo ubojstvo dodatno raspirati političke tenzije u inače nemimom Libanonu. (1)

Povećan broj nezaposlenih

ZAGREB • Stopa registrirane nezaposlenosti u Hrvatskoj je za listopad ove godine iznosila 16,8 posto, objavio je Državni zavod za statistiku. To je povećanje u odnosu na mjesec prije kada je iznosila 16,2 posto. No, to je ujedno manja stopa u odnosu na isti mjesec prošle godine, kada je iznosila 17,5 posto. (H)
