The screenshot shows the Nobelprize.org website. At the top, there is a navigation bar with links to Nobel Foundation, Nobel Media, Nobel Museum, Nobel Peace Center, and Nobel Web. Below this is a search bar and a logo for Nobelprize.org. The main content area features a banner for 'Educational Games' with a blue background and illustrations of people and scientific symbols. Below the banner, there is a paragraph explaining that these games are based on Nobel Prize-awarded achievements and are designed to be fun and educational. Underneath, there is a 'Recommended Games' section with two featured games: 'Laser' (The Nobel Prize in Physics) and 'Lord of the Flies' (The Nobel Prize in Literature). To the right of the main content, there is a sidebar with several promotional tiles, including 'Watch the Nobel Peace Prize Lecture!', 'Watch the Nobel Prize Ceremony!', 'Memories of the magic week', 'Oldest, youngest, most awarded', and 'Sign up for News from Nobelprize.org'.

TIME's Person of the Year 1927 - 2006

TIME's Person of the Year is bestowed by the editors on the person or persons who most affected the news and our lives, for good or ill, and embodied what was important about the year. See who made the grade over TIME's first eight decades—from aviators and ayatollahs to youths and, of course, You.

Nuclear Stress Testing

GE HEALTHCARE

FLOW CHART: Dark spots on this heart indicate inadequate fluid

◀ PREVIOUS NEXT ▶

How It Works

Doctors inject a radioactive substance into the blood, then use gamma-ray cameras to see how the blood moves through the heart. The test shows how well the heart is doing at keeping itself saturated with oxygen-rich blood. The test is often done twice, to check cardiac performance at rest and under physical stress.
