3060 Xibo Powered
Displays... *and counting*

Xibo is a new *dimension* in digital signage.
Display rich content quicker, easier, and more effectively than ever before

Features...

- Centrally managed from a web interface
- Simple and easy to deploy
- Wide range of media support
- Does not require specialist hardware
- Runs on Windows and Linux
- Support for RSS Feeds
- [Open Source](#) (that means Xibo is free!)
- and much more!

Free to use, **Free** to distribute, **Free** to modify – Xibo is a feature rich, fully scheduled, layout driven, enterprise grade open source digital signage solution (released under the [Affero GPL v3 or later](#)).

The Parallella project will make parallel computing accessible to everyone.

[Launched: Sep 27, 2012](#)

[Funding ends: Oct 27, 2012](#)

[Remind me](#)

Project Goals

Making parallel computing easy to use has been described as "a problem as hard as any that computer science has faced". With such a big challenge ahead, we need to make sure that every programmer has access to cheap and open parallel hardware and development tools. Inspired by great hardware communities like Raspberry Pi and Arduino, we see a critical need for a truly open, high-performance computing platform that will close the
