

# signator

Finally, a better way  
to handle  
documents!

**Digital signature  
for paperless  
business**

Simple.  
Efficient.  
Available.

# What is SIGNATOR?

**100% digital office**

**SIGNATOR is our trademark signature platform document management system that supports central approval and digital signing of documents.**

A digital signature is a prerequisite for establishing a digitally transformed business.

Use it for all documents that need legal validity such as electronic invoices, contracts, agreements, HR documents, purchase orders, travel invoices and more.

**75%** Total annual cost savings through digitization of documentation

**90%** Acceleration of your document verification processes - internal and with external partners

**Significant savings** per contractual document (personnel, paper, archiving,...)

Eliminate printers, scanners, and post office costs from your business processes that include documents.

By implementing the SIGNATOR signature platform, you will simplify and significantly speed up the processes that include approval, signing and exchange of documents, both internally and with your clients.

In case you already have a document management system, simply integrate it in SIGNATOR signature platform and INSTANTLY modernize your business.

# How to sign documents with SIGNATOR?

WHEN YOU TRUST DIGITAL

SIGNATOR provides the most efficient way to approve and generate legally binding documents.

## SELECT A DOCUMENT

Import the document through SIGNATOR or automate the process by integrating it with your DMS system.

## INCLUDE SIGNATORIES

Sign the document yourself and/or involve your colleagues, partners and clients in the process of digital signing and exchange of documents.

## SIGN THE DOCUMENT

Use a token, smart card or remote signature from one of EU/SWI trusted service providers.

---

## Advanced features

### Integration with Microsoft Office 365

Directly digitally sign documents from within tools you use the most! Word, Excel, Teams, Sharepoint.

### Integration with Google Workspace

Deep integration of digital signature into Google workspace by our Add-ins. Available in Docs, Sheets, Slides, Google Drive.

### Connectors and APIs

Many connectors are available for out of the box integration of digital signature into your apps. Build your own with available APIs and SDK.

# Adding VALUE

## Why is SIGNATOR the first choice for digital signature?

- easy to use
- includes identification, signing and payment
- has many connectors to other systems
- enables batch signing of documents
- available on computer or mobile
- best value for money

### Benefits for you?

#### EFFICIENCY

Efficient approval and exchange of legally binding documents in minutes! Get job done faster and smarter, not harder!

#### ECONOMY

Big savings through reduced paper and toner usage, post office and labor costs.

#### SIMPLICITY OF USE

Sign documents from within Microsoft or Google applications using our Add-ins.

#### SECURITY

The highest degree of security and legal validity defined by EU eIDAS and ZertES.
