

Silvio Svečnjak is an associate member at the Faculty of electrical engineering and computing in Zagreb. As a software engineer in Siemens Zagreb/Vienna he was involved in projects for development of GPRS/UMTS communication systems from 1999 to 2001. From 2001 he is working as a software consultant for Concept Design, Nottingham UK where he is providing consultant services for major communication companies (Siemens, Nokia, Anritsu) and is leading a project for development of 3G testing suite. In 2003 he is participating in implementation of UMTS charging system for Austrian mobile network provider.
